

The ORIGINAL Ground Protection Mats

Don't be fooled by knock-offs!

Ground Protection Matting

- Whether you need temporary access through harsh environments or need to get your equipment through a yard without damage, Checkers has you covered
- Mats for any size equipment, any application—with the highest load bearing capacity available on the market
- Durable, weather-resistant mats available in a full range of options

AlturnaMATS®

VersaMAT®

The Original Ground Protection Mats

Don't be fooled by knock-offs!

AlturnaMATS® • VersaMAT®

For more than 30 years, Checkers has been the market leader for innovative ground protection. With the largest and most respected range of matting on the market, Checkers mats are durable and robust. Mats are offered in a variety of sizes, colors and traction surfaces ranging from rugged traction to low-profile pedestrian traction to smooth.

Why Use Ground Protection Mats?

Unmatched Turf Protection

Using ground protection mats helps to disperse heavy loads and minimize soil compaction, decreasing soil erosion and possible water contamination. The flexible construction follows the contours of the ground, delivering a highly effective solution on sloping or undulating ground conditions.

Superior Temporary Access

Ground protection mats get equipment safely through mud, sand, snow and swampland conditions. Access to and from remote sites and a stable work area are critical safety requirements in many industries, such as construction, landscaping, oil & gas, utilities, and civil engineering. Mats with pedestrian-friendly treads provide safe walking paths and temporary sidewalks.

Save Thousands Compared to Wood

Checkers™ HDPE Ground Protection Mats

Superior load capacity—up to 120 tons

Impressive traction and grip in any weather conditions

Flexible—conform to slopes and inclines

Weather resistant—no warping, splintering, or breaking

Reliable long term

VS

Plywood

No definitive load bearing rating

No traction; mud or ice buildup creates hazardous conditions for vehicles and personnel

Unsuitable for slopes or inclines

Absorbs water and liquids which accelerates rotting

Limited life span, resulting in a higher cost over time

Choose Your Matting Solution

Load Capacity

With load bearing up to 120 tons, mats provide secure solutions for a variety of equipment. Plus, they're lightweight and easily man-deployed.

Material

HDPE (high-density polyethylene) mats are unaffected by weather, plus chemical and oil resistant. The plastic is flexible, conforming to uneven ground conditions to provide a secure surface.

Tread Pattern

Don't get stuck! Rugged treads provide the most traction, even in wet or icy conditions. Lower profile treads are ideal for pedestrians or walkways. Choose optional smooth sides to further protect hard surfaces.

Optional hand holes make handling easy.

Clear mats let the sun shine through to prevent browning of grass.

A Complete Line of HDPE Mats

Rugged, durable HDPE mats with a complete range of options

AlturnaMATS®

Aggressive diamond cleat tread ideal for heavy vehicle traffic

VersaMAT®

Low-profile flat oval tread ideal for pedestrian applications
